

BOND TESTER

QUALITY FUNCTIONALITY
AND DESIGN FOR MEASURING
THE MECHANICAL STRENGTH
OF BONDS

BOND TESTER

The fastest and most accurate bond tester. The *Bond Tester* is optimized for fast, accurate and reliable bond testing in the volume manufacturing environment.

The combination of patented technology and superior ergonomics with intelligent and intuitive software makes the *Bond Tester* the number one production bond tester; providing repeatable and reproducible results.

FASTER TESTING

Maximize your throughput with quick load tool to bond positioning, superior ergonomics and quick test speeds.

ULTRA-QUICK APPLICATION CHANGES

Multitek's thorough understanding of bond testing in the volume manufacturing environment underpins the no-compromise development of industry-unique multi-function cartridges (MFC's). The uniquely designed MFC's expand the versatility of manual testing on the Bond Tester, enabling ultra-quick application changeover - in just seconds.

SUPERIOR ACCURACY

Gain repeatable and reproducible test results, which are guaranteed and qualified with MSA and GR & R studies.

ULTIMATE FLEXIBILITY

Perform pull tests from 0.25 grams to 50 kilograms and shear testing from 0.25 grams right through to 200 kilograms.

INTELLIGENT SOFTWARE

The *Bond Tester* utilizes Paragon™ software which boasts a highly configurable and intuitive interface as well as a wide variety of advanced functionality such as automatic GR & R calculation, built-in diagnostics, a unique database search engine wizard and superior reporting.
